Agenda Item 10.3

Outdoor Table Tennis tables

We have two types of outdoor table. The permanent concrete tables as at Belmont Park, and the temporary aluminium tables located in parks and also areas such as Princesshay during the summer months. Earliest concrete tables have been in around 10 years now. The mobile tables came in via the 'Ping' project around 7 years ago.

Attached is information from Proludic- these are not the only producers but it gives an idea of types and **costs at 2008.**

Hi Paul,

R1000- £3141. Install of this item is £530

The frame is stone coated steel to give more natural finish than a steel frame, the playing surface is16mm plywood as used on our wooden multipay units, the net is stainless steel and slides into main table where it bolts in place.

J2205- £1989, Install is £244

The playing surface is Supported by 4 Galvanised steel posts- (It is definately a more lightweight version however it is still designed for out door parks.

if you need anything else please let me know

Kind regards
